Price Adjustments: Cut: Diamonds with better cuts trade at a premium. Diamonds with lesser cuts trade at discount.

Fluorescence: Diamonds with significant fluorescence may trade at substantial discount. **Certification:** Some certificates command a higher price point, while other certificates trade at discount. **Diamonds accompanied with Canadian Government certification trade at a premium.**

Other shapes, such as: Princess, Radiant, Emerald, Pear etc. sell for slight to extreme price discounts

News: Diamond trading markets are under massive pressure to increase prices for US Dollar decline vs. Canadian Dollar and the Euro. Shortage noticed for 1.50 and up to 2.00 carat high quality goods. 0.25 carat goods sell at high premiums. US Exchange rate dropped wholesale pricing in CDN funds dramatically. Retailers are expected to follow suite in the coming month. Christmas rush expected to influence availability and prices in the next month.
